Tell the story, including selling points and overall condition, to help other salesmen understand the condition.							Cory bought new back in 2010. Used on his small property just outside of town. He services the mower himself and I took a picture of the service records. Hood, deck, and tires in good shape. New deck blades 2 hours ago and oil change 17 hours ago. Seat has 1 small hole and a crack on it. It needs a front left wheel bushing which looks to be \$15. I started the mower and drove it around. I could hear is sputter some when I first started it up but it came out of it when I throttled up. Thinking it may just need something simple like new spark plugs, fuel filter, or air filter. Honestly I would probably just do one of those service kits that have all 3 in them.			
What are they purchasing?							Z330R			
If this is a UTV or 4 wheeler does it have a Title/MCO ? Does the customer have it.							NA			

SALES INSPECTION

								Estimated Cost		
	NEW	GOOD	USABLE	REPAIR	REPLACE	N / A	Comments	Parts	Labour	Total
